DETAILED ACTION

1. The amendment filed September 12, 2002 has been entered. It is noted that in view of the new amendment practice under 37 CFR 1.121 which became mandatory for all amendments on March 1, 2001, and due to the limited amount of examining time per application, if the amendment contains changes to existing language that requires a marked-up version showing those changes, the Examiner is relying upon the marked-up version(s) for examination of the application. It is applicant's responsibility to ensure that the clean version(s) is (are) the same as the marked-up version(s). It is further noted that the clean version(s) is (are) considered to be the Official version(s).

The indicated allowability of the claims is withdrawn in view of the newly discovered reference to Schofield, pn 955,287. Rejections based on the newly cited reference(s) follow. Because allowable subject matter was indicated in the first Office action of this CPA application, and the allowability of this subject matter is being withdrawn, this Office action is being made **non-final**. Any inconvenience caused by this action is regretted.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 3724

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 19, 20, 22-28 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Schofield, pn 955,287.

Schofield discloses a cutting assembly with every structural limitation of the claimed invention including a first shearing element (e.g., 1) comprising a handle (e.g., 3) and a second shearing element (e.g., 2) comprising a handle (e.g., 4), wherein each slot has opposing cutting edges (i.e., they face in opposite directions).

Claim Rejections - 35 USC § 102/103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 30-40 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Schofield, pn 955,287.

Schofield discloses a cutting assembly with every structural limitation of the claimed invention including tapered slots (e.g., 6, 7).

In the alternative, if it is argued that Schofield does not disclose tapered slots, the Examiner takes Official notice that it is old and well known in the art to at least slightly taper the

Art Unit: 3724

slots to facilitate receiving the workpiece. Therefore, it would have been obvious to one having ordinary skill in the art to provide at least a slight taper to the slots of Schofield for the well known benefits including that described above.
